

#1936 - AKI in D.M patients by diuretics

Authors and Affiliations Dr.jamileh morshedi nephrologist in Internal Medicine Department ,university of Medical Sciences,Birjand Iran

Corresponding Author and email Dr.jmorshedi@yahoo.com

Body In the current situation, D.M and HTN patients are more than before and CKD patients are more and therapeutic agents are various ,therefor we should be careful and donot use diuretics for control of HTN because they are harmful for D.M patients and caused AKI.The most harmful of them is T.H and then Hydrochlorothiazide and then spironolactone .
